

Procurement of Vehicles for Samoa Water Authority

RFT Reference: SWA-VT/2023

CLARIFICATION NO. 1

06 December 2023

The following comments are in response to clarification(s) from potential bidder(s) with regards to the procurement of vehicles for Samoa Water Authority. In the interests of transparency, all received requests have been compiled, addressed and sent to each bidder for reference.

1. **Having reviewed Section 3A specifications, we noted the outlined engine capacities and configurations. Our trucks feature engine capacities ranging from 2L to 3L, equipped with both single and biturbo-charged capabilities. We kindly request clarification on the flexibility of these specifications and whether there is room for consideration.**

The engine capacities and configurations stipulated under the Technical Specification of the Bid Document, are considered as the minimum technical specification of the vehicles required. If these minimum criteria are not met the offer will have to be disqualified.

(Section V – Schedule of Requirements 3. Technical Specification A.)
